

## Reconfiguration of new car retailing

Prof. Dr. Susanne Royer  
Uwe Stratmann

---

---

---

---

---

---

---

---

## Questions to address today

- What are the main driving forces of change in car retailing?
- What are the impacts on distribution structures and on manufacturer and dealer relationships?
- What are the long-term consequences on new car retailing?

---

---

---

---

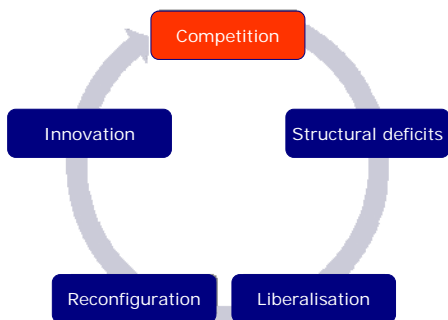

---

---

---

---

## Main driving forces of change

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

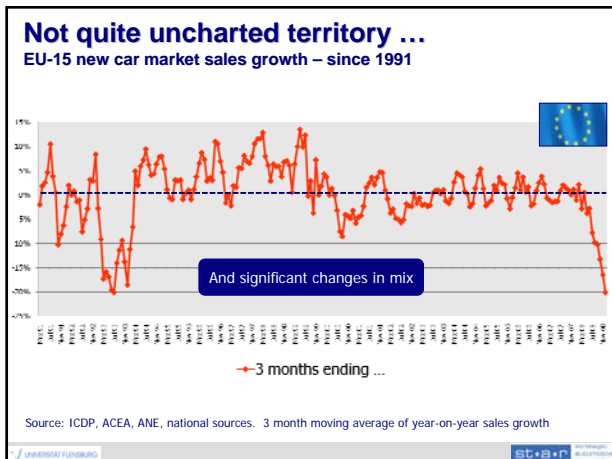

---

---

---

---

---

---

---

---

---

---

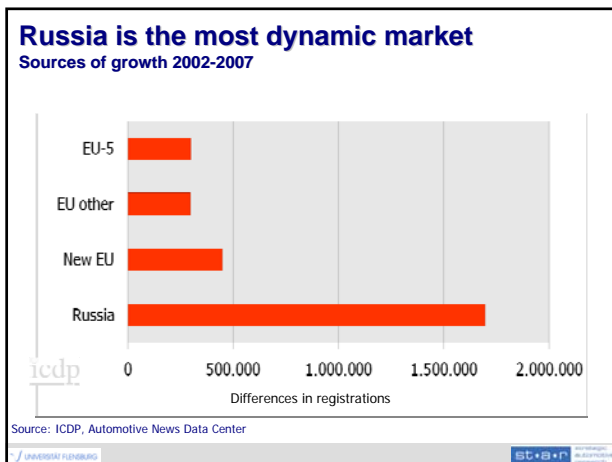

---

---

---

### Changing structures on manufacturer level

---

---

---

---

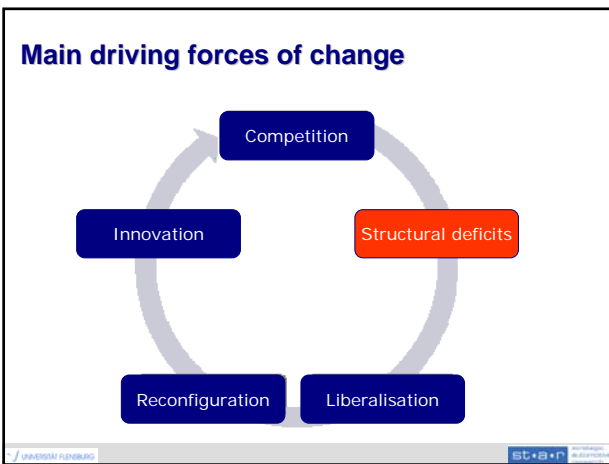

---

---

---

---

### Main driving forces of change

---

---

---

---

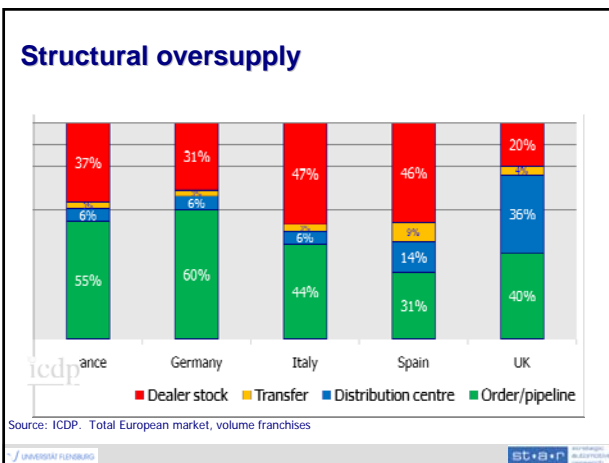

---

---

---

---

### Structural oversupply

---

---

---

---

---

---

---

---

## Dramatic push in the market

---

---

---

---

---

---

---

---

---

---

## Dealer profit is on a low level Example Germany

---

---

---

---

---

---

---

---

---

---

## Partnerships between Dealers and VMs Low dealer satisfaction index

---

---

---

---

---

---

---

---

---

---

## Main driving forces of change

---

---

---

---

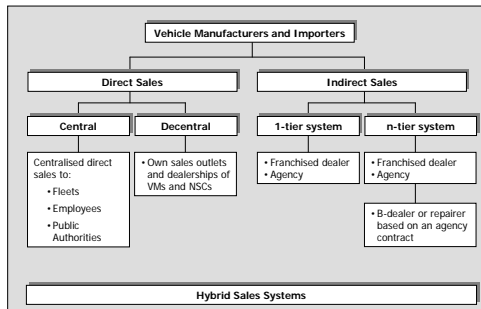

---

---

---

---

## Traditional distribution system

Source: based on Decker (2000, P.71)

---

---

---

---

---

---

---

---

## Types of Outlets (EU) Traditional outlet type is still dominant

Source: ICDP / GMAP European Car Distribution Handbook 2005 / L.E. Manufacturer Survey

---

---

---

---

---

---

---

---

## Liberalisation of franchised system

Year 2010:  
Not longer a specific regulation for the automotive sector – further liberalisation?

### New Car Distribution

- Ending of selective and exclusive link
- Ending of location clause
- Splitting of sales and service
- No restraints on multi-branding

### Repair and Maintenance

- Splitting of sales and service
- Standalone authorised repairers
- No quantitative limitation of repairers
- No restraints on multi-branding
- Free access to spare parts and technical information

### Parts Distribution

- No limits on numbers of authorised distributors
- OES can use the original spare parts claim now
- Authorised repairers are now freer in the choice of the parts distribution channel

## European Mega-Dealers: Pendragon

Pendragon

- 8% market share in UK (ca. 192,000 new cars)
- Up to 37% share on brand level
- 15,000 employees
- 290 outlets (with Reg Vardy)
- Focus on home market: 90% of turn-over in UK (5% in US, 1% in D but 2 Mio. Euro losses)

Objectives:

- Dominant position in UK to reach scales
- Position in front of the VMs

### Buying and marketing cooperation Examples in car distribution

**Aventi Automobile AG:**

- Cooperation between two strong regional dealers in Bavaria
- Separate, public quoted organisation
- 12 outlets and more than 4,000 cars sold
- Core objectives:
  - ♦ Synergies (back office)
  - ♦ Corporate marketing
  - ♦ Purchasing scales

**TEMOT INTERNATIONAL:**

- International buying consortia of independent parts wholesalers and retailers

**Auto Aktiv Nord:**

- Buying cooperation of 14 Mazda dealers
- Separate buying organisation to improve scale effects in
  - ♦ New cars (but limited scale)
  - ♦ Used Cars
  - ♦ Parts, lubricants
  - ♦ Re-financing conditions

## The Traditional Model is still alive!

- ⇒ Example US: Family owned dealerships play still a vital role – outlet sizes are above European average
- ⇒ Opportunities for SMEs by cooperation and high entrepreneurship
- ⇒ But, efficiency is key: franchise model has to be competitive with other distribution models
