

Teaching Assistant for fall semester 2022 (4-8 hours per week)

To support the preparation and execution of the lecture “Introduction to Operations Research” in the fall semester 2022 we are looking for a teaching assistant.

Main tasks might include:

- Proofreading of teaching material
- Assisting the development of new exercises
- Interacting with students via e-mail / forum posts
- Assisting the grading of exams
- Working on various ad-hoc tasks
- Maintaining course material in Moodle/OLAT

Requirements:

- Strong quantitative background (math, physics, computer science, engineering, economics, etc.)
- Basic knowledge of mathematical optimization and, in particular, linear programming
- Highest level of reliability and careful style of working
- Ability to study new material and find sources independently
- Interest in teaching mathematical applications

The tasks will approximately consume an average amount of 4-8 hours per week. Remuneration on hourly basis in line with UZH pay scale.

To apply as a teaching assistant for the lecture "Introduction to Operations Research" in the fall semester 2022, please send an email to rahel.giger@business.uzh.ch. Please outline your motivation and attach a curriculum vitae as well as a transcript of records.

Applications will be reviewed on a rolling basis until the position is filled, but all applications submitted by July, 15 will definitely receive full consideration.

We look forward to hearing from you!
